

Brush wires

Special wire for durable and resistant brushes

Product information

Brush Wires

Gustav Wolf brush wires are ideal for use in industrial brushes. Our brush wires are well known for durability, dimensional stability and low dust when rotating.

Brushes made from steel wire are used mainly for cleaning, grinding and deburring of surfaces. We offer brush wires uncoated or brass coated suitable for rotation.

Packaging

Brush wire is packed on sheet metal spools (max. weight 450 kg) and on plastic spools (max. weight 30 kg).

Technical data

Technical data

diameter	0,3-3,0 mm
tensile grade	1550-2450 MPa
surface	bright
	brass
	copper
