

Upholstery spring wire

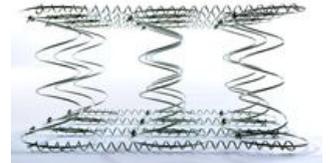

High-gradesteel springs for increased quality demands

Product information

Upholstery Spring Wire

Gustav Wolf produces high quality and durable upholstery spring wire which increased performance and quality demands: perfectly suited for the manufacture of various types of springs.

The gray wire with uncoated or phosphatized surface is suitable for the production of Bonell and Pocket springs.

Packaging

Upholstery spring wire is packaged on rosette coils or crown pillars with a maximum of 900 kg net weight shipped.
