

Spring steel wire

Versatile for all types of springs

Product information

Spring steel wire by Gustav Wolf is the ideal product for producing compressive, tension and torsion springs. Versatile in a number of types of springs and mechanical components, it will include used as a tension in a folding bed or bending part for automobile seats.

Packaging

Packaging is done on sheet metal spools, which can accommodate a wire net weight of about 450 kg, or Z III packages with a maximum weight of 900 kg. Other types of packaging can be discussed with your Gustav Wolf contact person.

Technical data

Specifications

diameter	1,0-7,0 mm
tensile grade	DIN 10270-1
surface	bright
	phosphated
	galvanized
	copper
